University of San Francisco, San Francisco, CA	BA	1995-99	Psychology
San Francisco State University, San Francisco, CA	MA	2006-08	Psychology- Mind, Brain & Behavior

A. Personal Statement

While psychology is my first passion, the path where medicine and mental health intersect has become my primary interest. In my career I have worked in a myriad of different research studies, examining some of the most pressing medical and psychological issues facing our society. Research is an essential part of the battle against illness, be it physical or mental. With the right mixture of focus, funding and perseverance, I truly believe that we can conquer several of the problems that we face as a society and ultimately contribute to the betterment of the world.

B. Positions and Honors
